# MOBILE APP DEVELOPMENT: RANEST

By Isaac Muliro

## THESIS: DESIGN AND DEVELOPMENT OF A CROSS-PLATFORM PRODUCTIVITY MOBILE APPLICATION USING CORDOVA

### Research Question

How can web technologies like Cordova be used to develop a functional, user-friendly mobile app that combines user authentication, note-taking, a planner, and post-sharing features across multiple platforms?

# PRODUCTIVITY APP DEVELOPMENT

- Tech stack( Cordova and web frameworks like React, Vue where needed for front end).

- Platforms(iOS or Android)

- Target Audience(Anyone within Academic field)

- App Features (User authentication, User Posts/Updates, Notes Taking. Document Sharing and Planner.

- Data storage options (In app data storage and firebase by Google for User auth and Persistence)

# REFINED IDEAS

- User authentication
- User Posts/ Updates
- Document sharing
- Notes Taking
- Planner.

# END?

End
